Education

Shri Ramswaroop Memorial University

Bachelor of Technology in Computer Science (CGPA: 8.32 / 10.00)

Expected May 2027

Lucknow, Uttar Pradesh

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Web Applications Development

Experience

Beans.ai

Software Development Engineer

May 2026 – Present

Noida, Uttar Pradesh

- Engineered sorting and drag-and-drop capabilities for MUI tables, improving data navigation efficiency by 40%.
- Optimized React table rendering with virtualization, enabling efficient processing of 2x larger datasets.
- Automated address data validation and standardization using Python and SQL, resolving 10+ anomalies and increasing verification hit rates by 40–50%.

ZingHR

Robotic Process Automation Intern

May 2024 – Aug 2024

Mumbai, Maharashtra

- Automated employee data processing through RPA workflows, reducing manual workload by 80%.
- Established live monitoring and error-logging mechanisms, accelerating issue identification and resolution.
- Strengthened employee data quality through PAN/Aadhaar validation and column-level checks, improving accuracy by 70%.

Projects

Club Management | React, TypeScript, Tailwind CSS, Vite, Recharts, Flask, JWT, PostgreSQL, Docker, Nginx, REST APIs

- Implemented 3-tier RBAC with automated membership and roster management for campus organizations.
- Streamlined event management with multi-stage approvals, centralized scheduling, and live attendance tracking.
- Boosted student engagement through leaderboards, shared media galleries, and real-time activity alerts.
- Built KPI dashboards with one-click PDF reports for institutional performance analysis.

InvoiceIQ | Java, Spring Boot, Spring Security, React, PostgreSQL, Redis, Docker, LLM APIs, OCR, JWT

- Engineered a multi-tenant B2B SaaS platform with RBAC, tenant isolation, and JWT-based authentication.
- Automated invoice data extraction using OCR, reducing manual data entry by 80%.
- Established invoice validation, anomaly detection, and duplicate matching with explainable risk scoring.
- Integrated approval workflows, cash-flow forecasting, and an AI Copilot for automated financial analysis.

FlowDesk | Java 21, Spring Boot 3, React, PostgreSQL, Redis, WebSockets, Docker, Prometheus, Grafana

- Engineered a full-stack workflow automation platform for cross-departmental requests, approvals.
- Implemented RBAC with granular permissions across 11 organizational roles, strengthening access control.
- Integrated WebSockets for real-time notifications and messaging alongside centralized document management.
- Established application monitoring and observability with Prometheus and Grafana to improve system reliability.

Technical Skills

Languages: Java, JavaScript, Python, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JDBC, Maven

Frontend: React.js, TypeScript, HTML, CSS

Databases: PostgreSQL, MySQL, Redis

Tools & Platforms: Git, GitHub, Linux, Docker, Postman, AWS S3

Certifications and Achievements

- Solved 600+ problems and participated in 10+ LeetCode contests.
- Amazon Junior Software Developer Professional Certificate, completed through Coursera.
