Education

Shri Ramswaroop Memorial University

Bachelor of Technology in Computer Science CGPA: 8.32 / 10.00

Expected May 2027

Lucknow, Uttar Pradesh

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Experience

Beans.ai

Software Development Engineer

May 2026 – Present

Noida, Uttar Pradesh

- Enhanced MUI tables with sorting and drag-and-drop interactions, improving usability for large data views.
- Streamlined React table rendering with virtualization, supporting datasets 2× larger with smoother interaction.
- Analyzed address datasets with Python and SQL, identifying 10+ data anomalies and increasing successful verification rates by 40–50%.
- Investigated geospatial and AI workflow issues, identified root causes, and implemented fixes to improve data reliability.
- Boosted internal geospatial tooling with polygon overlap and alignment checks, improving spatial accuracy during map creation.

ZingHR

Robotic Process Automation Intern

May 2024 – Aug 2024

Mumbai, Maharashtra

- Automated employee data processing through RPA workflows, reducing manual effort by 80%.
- Introduced monitoring and error-logging workflows, reducing the time required to identify processing failures.
- Validated employee records using PAN/Aadhaar checks and column-level rules, improving data accuracy by 70%.

Projects

Club Management | TypeScript, Flask, Python, PostgreSQL, SQLAlchemy, JWT, REST APIs, Docker, Tailwind CSS

- Created a full-stack club management platform with React, Flask, and PostgreSQL for Admin, Club Head, and Student roles.
- Secured REST APIs with JWT authentication and RBAC, controlling access to club, membership, and event operations.
- Streamlined event workflows for activity creation, review, approval, and scheduling, with membership and attendance tracking.
- Modeled relational data using SQLAlchemy and exposed REST APIs for club, membership, and event management with Docker-based deployment.

InvoiceIQ | Java, Spring Boot, Spring Security, React, TypeScript, PostgreSQL, JPA/Hibernate, JWT, OCR, LLM APIs, Docker

- Developed an invoice management platform with Spring Boot, React, and PostgreSQL, supporting creation, search, pagination, and CSV export.
- Enforced role-based access with Spring Security, JWT, BCrypt, and RBAC for Admin and Employee accounts.
- Integrated OCR and LLM-based extraction using PDFBox, Tesseract, and LLM APIs to capture vendor, tax, amount, and line-item data.
- Implemented invoice validation and duplicate detection to flag inconsistent and repeated records through a React and Material UI interface.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JDBC, Maven

Frontend: React.js, HTML, CSS, Material UI, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB

Tools & Platforms: Git, GitHub, Linux, Docker, Postman

Certifications and Achievements

- Solved 600+ LeetCode problems and participated in 10+ contests.
- Amazon Junior Software Developer Professional Certificate - Coursera.
